1. Per ref (a), ref (b) received ref (c) through (e) SFR's from ref (f). Each SFR is reviewed and is assigned an SFR number by ref (b) and processed through the Hardware Systems Command (HSC) Technical Authorities (TA) ref (b) and (g). The following information provides the current status of your SFR's.

2. Concerning ref (c) SFR# 4946 per ref (g):

Mike,

Since this material was not requested to be used or stored onboard surface ships, the material should remain as previously listed: restricted on CVN T-SHML and prohibited on all other surface ship T-SHMLs. The MMI Code should remain as N.

It doesn't look we have the MSDS for this fabric. I could have possibly written the number down wrong so if you could verify that you need this for part number Z7046 of which is Black Fabric I would appreciate it.

Mike,

I do not know if you misunderstood what I said or not. All the six NICNs have been discontinued or cancelled on 15 May 2015. They are no longer active. I do not know if they assigned NSNs to the items or just discontinued the NICNs without a replacement. Either way the NICNs need to be made obsolete on the SHML.

If you have any questions, please ask.

When the NSNs are assigned, please add each NSN to the Master SHML with AOB 'A' and MMI 'N'. The NSNs should be authorized on all T-SHMLs except for LCS and submarine. No remarks are necessary.

Thanks.

Hi Mike,

The MSDS is attached. The units of measure are as follows: 0.5 gallon can (2 per box), 1 gallon can (6 per box), 2.5 gallon can, 6 gallon can, 30 gallon drum and 55 gallon drum. I do not know anything about the pricing. My POC for these products is Claude Klein (Phone: 504-388-3670; Email: cklein@bellsouth.net). He may be able to help with pricing if you can't get anyone at the other number.

Marianne,

Would you please resend the MSDS to me. I don't have it. Also I need the unit of measure for each item; for example is it a 1 gallon can, bottle, jug, aerosol, etc.? I called the 337-334-2883 number that you provided requesting the price of each one-nobody was there. If you happen to know the price of each one, that would be helpful. As soon as I get this information, I will start working on these NSN assignment requests. Thanks and have a great weekend.

Mike

Mike,

Attached is the NSN request for PCS7 Marine Clean. It is a general purpose cleaner, so there is no technical requirement, but it is authorized per NMCPHC HHA and by NSWCCD Code 635 review. There are several units of measure that the manufacturer is seeking NSNs. I listed them all on this one form, but if you would rather I submit a separate form for each size, let me know and I will do so. Let me know if you need anything else.

PCS 7 Marine Clean Technical Data

PCS 7 is a liquid detergent suitable for cleaning soils heavy and light on all surfaces by manual cleaning, pressure washing and automatic scrubbing machines. This detergent has a neutral PH and is one of the most versatile detergents you can use. It is a highly, concentrated and composed of surfactants, wetting agents, foam stabilizers, water softeners, corrosion inhibitors and free rinsing agents. It is very effective in many cleaning applications such as pressure washing or spraying and wiping using cold or warm water.

The surfactants in PCS 7 are a blend of chemicals used for reducing the surface tension of liquids so that it can spread out effectively onto the surface being cleaned. Our surfactants promote and enhance the wetting and emulsification and breaks down the surface tension of the hydrocarbon molecules so that they are more conducive to bioremediation. The many different surfactants were chosen specifically based upon how they react during the bioremediation process in unison with other chemicals blended into the formulation of PCS 7. This detergent contains some of the highest quality, most expensive materials available and are designed to chemically break down hydrocarbons or various soils.

PCS 7 does not include materials that are considered carcinogens, reproductive hazards or considered to be ozone-depleting substances and would not be classified as a hazardous waste according to 40 CFR 261.

PCS 7 is biodegradable and meets the criteria in 40 CFR. This product is safe on all surfaces.

PCS 7 has a shelf life of at least 36 months and will not exhibit fallout or deterioration.

PCS 7 is a Bio Preferred Product. Certification ID#3125 (July 27, 2012)

Mike,

USS America (LHA 6)

Reg. Do not add.

SFR #4968: The SFR requested material (NSN: 8520-01-415-2931; Hand Cleaner) was never authorized for onboard use. However, NSN 8520-01-521-4203 comes in the same UI (sixteen 450 mL cartridges) as the requested material and can therefore be used in the dispensing units onboard. Furthermore, NSN 8520-01-521-4203 is authorized for use on the LHA T-SHML. Therefore, NSN 8520-01-521-4203 should be used in place of the requested material. The requested material should be listed on the Master and all T-SHMLs with AOB 'P' and MMI 'N'.

Respectfully,

Mike,

USS America (LHA 6)

SFR #4968: The SFR requested material (NSN: 8520-01-415-2931; Hand Cleaner) was never authorized for onboard use. However, NSN 8520-01-521-4203 comes in the same UI (sixteen 450 mL cartridges) as the requested material and can

therefore be used in the dispensing units onboard. Furthermore, NSN 8520-01-521-4203 is authorized for use on the LHA T-SHML. Therefore, NSN 8520-01-521-4203 should be used in place of the requested material. The requested material should be listed on the Master and all T-SHMLs with AOB 'P' and MMI 'N'.

Randy / Iris,

Good day. As discussed, attached is the SFR request (Approved by CO). Please note that the two (2) NSN items are obsolete and ECOLAB do not have any substitute NSN. Those two (2) Obsolete NSN are specifically for the dispenser units.

Please advise if the two (2) obsolete NSN have to be procured under GUCL funding through credit card purchase. Will need 100 BX for each of the obsolete NSNs.

Thank you.

Randy,

Underneath my signature below is the SFR instruction explaining how to fill out an SFR. The same instruction applies to the spread sheet that Scott Stanko just sent you. You may email the spreadsheet directly to me if you like with any attachments that you have. Please follow the instruction so as not to get any of your SFR requests rejected due to lack of technical data. . If you have any questions, please ask and I will help you any way I can.

Thank you.

Scott,

We have been working the HAZMAT AEL for the LHA 6 and have come onto some items the Ship's Force personnel have identified as needed shipboard that are not included in the T-SHML. What action needs to be taken to make this adjustment request?

We also have some prohibited and obsolete we are working through and any advice/direction you may have to help in this area would be helpful as well.

All tabs are identified. If you have any questions/concerns, please don't hesitate to call.

Thanks!
Randy
